

R RANJITH

Senior Software Developer | Full-Stack (React / Node.js / TypeScript)

Bengaluru, India | +91 79041 25027 | ranjith.57neela@gmail.com | linkedin.com/in/ranjith

PROFESSIONAL SUMMARY

Senior Software Developer with 4+ years of experience architecting and shipping production full-stack web and mobile applications. Specialized in React, TypeScript, and Node.js, with end-to-end ownership spanning backend APIs, payment and messaging integrations, admin dashboards, and DevOps pipelines. Delivered 80+ applications across SaaS, marketplace, and enterprise platforms, including a B2B marketplace serving live retail customers and a SaaS product used by 50,000+ B2B users. Experienced leading engineers, driving architecture decisions, and using AI-assisted tooling to raise delivery speed and code quality.

TECHNICAL SKILLS

- **Languages & Frontend:** JavaScript, TypeScript, React.js, Next.js, React Native (Expo), Redux Toolkit, TanStack Query, Context API, HTML5, CSS3, Tailwind CSS, Material-UI
- **Backend & Data:** Node.js, Express.js, REST APIs, GraphQL, MongoDB, Mongoose, MySQL, Redis, JWT Auth, Strapi
- **Cloud & DevOps:** AWS, Docker, Jenkins, CI/CD Pipelines, Git/GitHub, Cloudinary, Firebase
- **Integrations & Tools:** Razorpay, Easebuzz, Meta WhatsApp Cloud API, Postman, WordPress, Shopify, Chrome Extension APIs
- **AI-Assisted Development:** OpenAI APIs, ChatGPT, GitHub Copilot, Claude Code, Cursor

PROFESSIONAL EXPERIENCE

Senior Web Developer — Webxinfinity IT Solutions, Bangalore

October 2021 – Present

- Led frontend development for **Communn.io** B2B SaaS platform serving **50,000+ active B2B users** with React and TypeScript, and contributed to backend APIs with Node.js and MongoDB for user management, payment integration, WhatsApp API, content management, and analytics dashboards.
- Led frontend initiatives including task planning, code reviews, and sprint coordination; collaborated with designers, backend engineers, and product managers to align UI/UX goals with technical feasibility.
- Built and shipped a Chrome extension for network traffic analysis, reaching **10,000+ active users** and a 4+ star rating, cutting API-testing time by 60% via real-time HTTP/HTTPS capture and Postman export.
- Delivered and supported **80+ client applications** (React, WordPress, Shopify) across healthcare, education, retail, and finance, maintaining **95% client satisfaction** across the full project lifecycle.
- Mentored a team of 5 developers and led code reviews and sprint planning, improving overall code quality by 35%.
- Set up Jenkins/Docker CI/CD pipelines for automated builds and deployments, cutting release cycles by 40% and enabling faster, more reliable ships to production.

KEY PROJECTS — WEBXINFINITY IT SOLUTIONS

Communn.io — Multi-tenant Community & Commerce SaaS Platform (Node.js, Express, MongoDB, Redis, React, TypeScript, Razorpay)

- Own the billing core — designed and maintain the Community → Plan → Subscription → Sequence → Payment → Settlement domain model; led a dual-gateway migration (Easebuzz to Razorpay) on a live, revenue-critical pipeline, and resolved recurring production billing defects (installment due-date corruption, tenant-mapping race conditions) to stabilize billing at scale.
- Built the WhatsApp Business marketing/CRM integration (Meta Cloud API + Interakt) — visual chatbot flow builder, broadcast/drip campaigns, shared team inbox, and Shopify-driven order automation.

LifeSave Medicals — B2B Pharmaceutical Marketplace (Node.js, TypeScript, MongoDB, React, React Native)

- Architected a 4-app full-stack platform — Express/TypeScript backend, two React frontends, and a React Native/Expo Android app — live in production at lifesavemedicals.com, serving pharmacy customers across Karnataka.
- Built JWT-based auth with RBAC and OTP verification, Razorpay payments with PDF invoicing, and pincode-based delivery serviceability logic; hardened APIs with rate limiting and CORS allowlisting.
- Built an Ant Design admin dashboard for catalog, CRM, staff, and order management, and shipped the companion Android app to the Google Play Store.

Daisy Minds LMS — Enterprise Learning Management System (React 19, TypeScript, Node.js, MongoDB Atlas, Redis)

- Architected a production LMS across 3 apps (admin/student portal, marketing site, REST API) with role-based access for admins, trainers, and students.
- Built course authoring, live classes, attendance, and a unified assessment engine, plus Razorpay billing and QR-verified PDF certificates, on a validated, secure-by-default backend with Swagger-documented APIs.

Task Management CRM — In-House Employee & Client Management (Solo) (React, TypeScript, Node.js, Express, MongoDB)

- Solo-built a full-stack CRM (React/Vite web client + Express/MongoDB REST API) with JWT auth and role-based access (Super Admin/Admin/Member), covering the full client-to-cash lifecycle — pipelines, proposals, projects/tasks, invoices, and payments across 18+ data models.
- Built a drag-and-drop kanban pipeline board, shared team calendar, threaded task comments, and a notification system with email/WhatsApp delivery and scheduled due-date reminders.

EDUCATION

Bachelor of Engineering — Computer Science & Engineering Karpagam Academy of Higher Education, Coimbatore | 2016 – 2020 | CGPA: 7.90

CERTIFICATIONS

Modern React with Redux · HTML5 & CSS3 (Advanced) · Programming in HTML5 with JavaScript & CSS3 · WordPress (Beginner to Advanced)
